

Poker

By Nat Christian

My thoughts on Poker and how to apply it to life/business

- 1 - Don't make decisions based on emotion.
- 2 - Don't let tiredness make decisions.
- 3 - Have patience.
- 4 - Be willing to give up great hand
(starting off with 2 aces in the hole makes you feel like you're better than everyone else till you get your ass kicked).
- 5 - Don't get greedy
- 6 - Don't be too suspicious
- 7 - Respect the cards on the table.
- 8 - If you see a pair dropped on the table - Run. Run like your life depends on it. It will eat your young'ns.
- 9 - Don't try to bully with bets
- 10 - Just because you get very lucky on a last card - Don't think that same kind of luck will happen again soon.
